To City Planner and City Engineer
City of Lake Forest

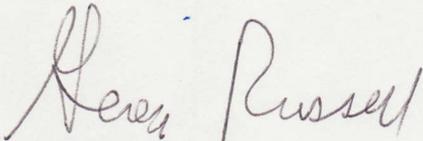

Our 11 unit condo association has just completed replacing our exterior cladding with stucco from the original EIFS. We employed Eric Mazur of Continental Wall Systems for this complex 3 month project.

Every owner in our building speaks very highly of the quality of the work and of the attitude of Eric and his team. Despite the rainy season the work was completed on time and on budget.

We also employed Peter Witmer of Witmer and Associates who worked closely with Continental Wall to ensure that the construction met the standards of the City and of our association.

We are glad to provide to serve as a testimony to others who are considering the replacement of their stucco or other exterior work. We cannot say enough good about their services.

Thank you,

George Russell
President
